# Principles of Inclusive Practice: Pupils with SEND

There are 4 broad areas of SEND that need to be considered when observing, planning and teaching lessons that support the needs of pupils with SEND:

1. Communication and interaction difficulties
2. Cognition and learning needs
3. Social, emotional and mental health difficulties
4. Sensory and/or physical needs

University of Hertfordshire UH

## Focused Observation of Practice (FoP): Pedagogy (Cognitive Science)

**Comments: these can be things that you notice and questions you would like to ask to find out more**

**Reflections: If you can, please discus your questions and comments with the teacher that you have observed**

**N.B. If being used by a student teacher to observe a lesson, we suggest you focus on only 1-2 of the areas listed below.**

Teacher's Name/Subject..... Class/Set..... Date/Time.....

| **Capturing Attention**<br>• What cues does a teacher use to signal what they want the students to focus on? | **COMMENTS/QUESTIONS** |
|---|---|

University of Hertfordshire UH

- How do they amplify any object of interest in a slideshow or when using a whiteboard?

**Instructional Design**

- What do you notice about the slides used and are they designed to provide access for all students?
- Is unnecessary information eliminated from slides (redundancy effect)?

**Activating Prior Knowledge**

- Does the teacher start the lesson with some form of (formative) assessment? What type of assessment did they use?
- Ask the teacher how they chose the questions to ask the students at the start of the lesson?
- Were any questions from topics taught weeks ago? Why did the teacher ask these questions?
- Does the teacher refer to learning from previous lessons?

**Modelling and Scaffolding**

- When the teacher tells the students about an activity they have to do, do they unpack the thinking behind it?
- Does the teacher present information in small steps and in a logical sequence
- Does the teacher used worked examples to model concepts?
- Does the teacher fade the use of scaffolds as understanding develops?

**Deliberate Practice**

- Does the teacher give the students time to practice independently what they have been taught in the lesson or do they have plans for this to happen in the future?
- How are student errors corrected?

**Checking Understanding**

- How does the teacher check for understanding throughout the lesson?
- What do they do with the responses they have received from checking understanding?

**REFLECTIONS AND NEXT STEPS**

**Can you relate what you saw in the lesson observation to some theories from cognitive science?**

- 
- 

**How will you use this observation to help you with your planning and teaching?**

- 
-
