Principles of Inclusive Practice: Pupils with SEND

There are 4 broad areas of SEND that need to be considered when observing, planning and teaching lessons that support the needs of pupils with SEND:

1. Communication and interaction difficulties
2. Cognition and learning needs
3. Social, emotional and mental health difficulties
4. Sensory and/or physical needs

Focused Observation of Practice (FoP): Pedagogy (Planning and Sequencing)

Comments: these can be things that you notice and questions you would like to ask to find out more

Reflections: If you can, please discus your questions and comments with the teacher that you have observed

N.B. If being used by a student teacher to observe a lesson, we suggest you focus on only 1-2 of the areas listed below.

Teacher's Name/Subject..... Class/Set..... Date/Time.....

Sequencing within/across lessons • Are concepts taught in a logical order, with foundational	**COMMENTS/QUESTIONS**

concept knowledge being introduced/revisited first? How does this support pupils' thinking and learning? • Has the teacher considered what pupils will need to think hard about during the lesson/sequence of lessons? How is this challenge presented to pupils? • How is prior knowledge drawn from and built upon? • How does the teacher make memorable key points/important information? • How does the teacher make their explanations clear? e.g. do they use visuals; how much time is given for explanations; what type of language is used; are explanations broken into smaller sections and/or repeated, etc.? • How does the teacher adapt their explanations and classrooms tasks to support the needs of the full range of ability in the group? When do they provide/remove modelling/scaffolding and why? • How does the teacher ensure they have given clear instructions and that all pupils understand them? • Are there opportunities for problem solving and critical thinking? At what stage of the sequence of learning does this take place? How does this support pupil thinking and learning, and why? • How are pupils encouraged to think about and/or regulate their own learning? • How is the attention of pupils drawn to a summary of their learning at the end of lesson/sequence of lessons? • What types of suitable resources were selected for the lesson(s) and why? • Were opportunities for learning technology to be used to enhance pupils' learning? **Questioning** • How does the teacher use questioning to actively engage a wide range of pupils during the lesson(s)? • Are questions planned or spontaneous? Are a range of open/closed questions asked? When and why? • Are students provided with appropriate wait time to respond to questions? How is this managed by the teacher? • How does the teacher draw on their secure subject knowledge to answer questions/support pupils/provide additional challenge? • Are there opportunities to develop questions into opportunities for whole-class discussion and debate? **Presence** • How does the teacher use tone and pitch of voice to engage and motivate pupils? • How does the teacher vary pace during the lesson? e.g. what happens to pace during complex explanations; what happens to it during group work, etc.? • How are physical gestures, facial expressions, mannerisms, body language, movement used to motivate, engage and support all pupils?	

REFLECTIONS AND NEXT STEPS

What was successful about how planning and sequencing was used within the lesson and why?

-
-

How will you use this observation to help you with your planning and teaching?
